

AltaPay & Magento Installation Guide

AltaPay has made it much easier for you as merchant/developer to receive secure payments in your Magento web shop. AltaPay is fully integrated with Magento via a plug-in. All you have to do is to install the plug-in, which will only take a few minutes to complete.

We will show you how to complete the installation through a step-by-step guide. Follow this guide to start accepting payments globally.

To make the set-up as smooth as possible for you, this installation guide is divided into following sections:

1. PREREQUISITES	2
2. INSTALL THE PLUG-IN	2
3. CONFIGURATION OF ALTAPAY BUNDLE	2
4. CUSTOMIZATION	3
5. SUPPORTED FUNCTIONALITIES	4
6. CHANGE LOG	4

1. Prerequisites

We highly recommend to gather all the below information before starting the installation.

1. Receive plug-in
 - a. Contact support@altapay.com. They will send you the plug-in.
2. Prerequisites for configuration the plug-in. AltaPay provide these.
 - a. AltaPay credentials and gateway information
 - i. Username
 - ii. Password
 - iii. Terminal
 - iv. Gateway
3. Prerequisites for fraud detection
 - a. Agreement with external fraud partner such as ACI ReD or MaxMind. Be aware that only 'Accept' and 'Decline' recommendations are accepted. AltaPay enables the fraud detection on the terminal.

2. Install the plug-in

Install the plug-in by extracting it into the root folder of your Magento installation.

3. Configuration of AltaPay bundle

Pensio Payments Save Config

Overview

Pensio - One Contact. One Contract.
 Pensio is a full-line supplier of payment solutions supporting customers, merchants and financial institutions to safely process payment transactions. We are focused on handling customer payments securely and efficiently and on offering merchants deep, real-time insight into transaction information.
 Please select from our available methods below.

API / Integration Settings

Note:
 Typically your installation for testing will be "https://testgateway.pensio.com" and for production it will be "https://yourdomain.pensio.com". Your Username and Password may be different for testing and live

Installation: [STORE VIEW]

API Username: [STORE VIEW]

API Password: [STORE VIEW]

Pensio Payment Gateway 2 - for additional payment method.

Note:
 Before you can use the Gateway you must make sure that your Magento installation is visible to the outside as Pensio's Payment Gateway will be performing callback calls with information about the payment.

Enable: [STORE VIEW]

Terminal: [STORE VIEW]
▲ You need to set your username / password above before you can choose your Terminal.

Title: [STORE VIEW]

Payment Action: [STORE VIEW]

Sort Order: [STORE VIEW]

1. Go to: System → Configuration → Pensio (If you get a 404 error, please flush your cache and logout and in again).
2. Define the gateway URL, username and password (URL for test environment is <https://testgateway.altapaysecure.com>).
3. Save the config to have the plug-in to pull a list of available terminals
4. For each of the Gateway groups, you have the following options:

Pensio Payment Gateway - Allows your customers to purchase with any of the payment options you have enabled in your Pensio account.

Note:
Before you can use the Gateway you must make sure that your Magento installation is visible to the outside as Pensio's Payment Gateway will be performing callback calls with information about the payment.

Enable	<input type="text" value="Yes"/>	[STORE VIEW]
Terminal	<input type="text" value="AltaPay Callback Fail Test Terminal"/> <small>▲ You need to set your username / password above before you can choose your Terminal.</small>	[STORE VIEW]
Title	<input type="text" value="Credit Card"/>	[STORE VIEW]
Payment Action	<input type="text" value="Authorize Only"/>	[STORE VIEW]
Sort Order	<input type="text"/>	[STORE VIEW]

- a. Enable = Enable the payment method in the checkout
- b. Terminal = Here you select the appropriate terminal
- c. Title = Define the title shown in the checkout (this will not affect the name used other places, e.g. the e-mail send to customers)
- d. Payment Action = Here you define if only an authorization should take place, or if the transaction should be captured immediately
- e. Sort Order - Defines the order in which the payment methods are listed in checkout

Save the file and make sure the Application-xxxx.js and current.js files have been regenerated

4. Customization

It is possible to customize various aspects of the plug-in. Below is a list with the most relevant files:

- Render the payment page
app/design/frontend/base/default/template/pensio/checkout/form.phtml
- Style the payment form
app/design/frontend/base/default/template/pensio/checkout/magento_styling.css
- Display a failed page to the customer
app/design/frontend/base/default/template/pensio/checkout/failed.phtml
- Define what is stated as the payment method in the consumer's e-mail
app/design/frontend/base/default/template/pensio/payment/info/gateway.phtml

5. Supported functionalities

Supported functionalities:

- Use of Magento shop layout on payment pages
- Support for scopes
- Order-ID is pre-assigned when customer is sent to the gateway
- The basket is only converted to an order when the payment is successful
- Pending state for various payment methods

Feel free to contact our support team (support@altapay.com) if you need any assistance during the installation process or have questions regarding specific payment methods and functionalities.
